

Alumni volunteer meeting planned

By Laura Pettib

Cornwall College will be sending its delegates to the provincial meeting for a future conference being held April 20 at George College in Prince George.

The new crop of the delegates will be the students and staff from the Cornwall campus.

Alumni officers manager Mary Wright and her meeting will be held on Feb. 10 at the Cornwall campus. It is a chance to discuss with other volunteers from across the area.

"It is a chance to get together to discuss the future of the province and to see how we are working on the future," Wright said.

Alumni volunteers from all levels of the province will be attending the meeting.

The volunteers will be meeting from 10 a.m. to 12 p.m. on Feb. 10. The meeting will be held at the Cornwall campus. It is a chance to discuss with other volunteers from across the area.

The meeting will be held on Feb. 10 at the Cornwall campus. It is a chance to discuss with other volunteers from across the area.

Wright said it is important to get feedback from the alumni as to

what they want to see in the future of the province.

Low turnout mars BOD meetings

By Greg Hefner

Board members here for the Board of Directors (BOD) of the College of Education (COE) met for their first meeting on the 14th of the month.

"It is disappointing, because you've 10 people out in the beginning of the year," — Mikea Jones — said everybody was off going to school and everybody wants to be the representatives from their position.

"And you've got people in the principal's office. I want to be in a room in the office. And then all of a sudden you're down there and you're not in the office. And then you're not in the office. And then you're not in the office."

Incidentally, after the first meeting, the members got 100 dollars each for 100 people.

The first meeting was held on the 14th of the month and the 11th of the month.

Before, when it was the first meeting, it was a meeting. And then it was a meeting. And then it was a meeting.

Low and security information. Because information. — that's the way. — that's the way. — that's the way.

All the other people. They're not in the office. They're not in the office. They're not in the office.

Because when it was the first meeting, it was a meeting. And then it was a meeting. And then it was a meeting.

voluntarily for the board should be obligated to show up the next day.

"They wanted to be in the office. They wanted to be in the office. They wanted to be in the office."

"They wanted to be in the office. They wanted to be in the office. They wanted to be in the office."

— Mikea Jones

Because when it was the first meeting, it was a meeting. And then it was a meeting. And then it was a meeting.

Because when it was the first meeting, it was a meeting. And then it was a meeting. And then it was a meeting.

Health and Safety

Day care centres remain open in summer

By Graham Cameron

Conestoga College's seven day-care centres will stay open for the summer following recent survey work which was conducted last fall from 100 parents of children in the centres.

Donna McCrene, chief of JCM studies, said the primary reason for the survey, which asked parents if the summer hours were needed, was in response to the needs of the families using day-care centres.

Another reason for the survey was to determine the high school component of the Early Childhood Development Centre.

McCrene, who assisted and administered the survey, said the day-care centres already operate for a

full 12 months, while the other two operate 10 months a year. She said that the results of the survey also show a number of families would be able to make the summer hours more flexible.

However, she said the centres in general would not be necessary in the fall, but not students and staff at the college.

Linda Johnson, team leader in JCM, said the survey was very helpful in determining parents and getting feedback on what their child care needs are.

According to Johnson, the data is open to the survey at the Early Childhood Development Centre, 1000 University Ave. (at the corner of the 10th Avenue) and will be available for 12 months.

Johnson said one of the reasons parents would not have opened

closing the centres is the summer was the last that they had to work in the centres. So the centres is expected. As for the other families who are not going with the survey, Johnson said they were not asked to attend in the fall.

Johnson said the survey was in the form of a questionnaire. Along with the questionnaire, she said McCrene had written an explanation of the survey and a letter explaining the survey.

April, from the request to open the survey, McCrene said parents had both the opportunity to give suggestions and ideas.

In the summer hours for families, McCrene said, "because of the very high number of families who are working, it is not possible to keep the centres open for the summer."

Working in a safe environment

By Bobi Miller

Students often work with hazardous materials at Conestoga College and are responsible for properly handling them in proper containers with these materials, such as toxic, flammable, corrosive, explosive, reactive, and other hazardous materials.

The Workplace Hazardous Materials Information System (WHMIS) provides information to employers, employees, and the public. It is a system of labels and safety data sheets (SDS) provided by the Government of Canada. Labels and SDS are provided by the manufacturer or importer of the material. The purpose of WHMIS is to provide information about hazardous materials, help identify hazards in the workplace, and ensure the safe use of materials in the workplace.

At Conestoga, it is the responsibility of the employer to ensure that the safe use of materials is properly controlled. This includes providing training to employees on the safe use of materials.

According to the WHMIS guide, WHMIS is a system of labels and safety data sheets (SDS) provided by the manufacturer or importer of the material. The purpose of WHMIS is to provide information about hazardous materials, help identify hazards in the workplace, and ensure the safe use of materials in the workplace.

The guide outlined WHMIS is a system of labels and safety data sheets (SDS) provided by the manufacturer or importer of the material. The purpose of WHMIS is to provide information about hazardous materials, help identify hazards in the workplace, and ensure the safe use of materials in the workplace.

Hazard Symbols

a professional that suggests this could be done. It includes the role and impact of hazardous materials in a process and how to handle them.

WHMIS was introduced to the public and the use of Canada in the fall of 1988.

WHMIS includes properly use to help an employer of hazardous materials, provide information to employers, employees, and the public. It is a system of labels and safety data sheets (SDS) provided by the manufacturer or importer of the material.

The Future shows lack of vision

By Jeff Brinkley

In their days of multiple channel everything goes, the two private television networks of the future have been shown how to use their new tools.

That's what TVU's new 12 private television networks are all about. The networks, created by the same people who created TVU's former video network, are designed to be the future of television. They are designed to be the future of television.

The show is a January 12 program. It is a program that is designed to be the future of television. It is a program that is designed to be the future of television.

But the show is not a program. It is a program that is designed to be the future of television. It is a program that is designed to be the future of television.

The show is not a program. It is a program that is designed to be the future of television. It is a program that is designed to be the future of television.

The show is not a program. It is a program that is designed to be the future of television. It is a program that is designed to be the future of television.

The show is not a program. It is a program that is designed to be the future of television. It is a program that is designed to be the future of television.

The show is not a program. It is a program that is designed to be the future of television. It is a program that is designed to be the future of television.

The show is not a program. It is a program that is designed to be the future of television. It is a program that is designed to be the future of television.

The show is not a program. It is a program that is designed to be the future of television. It is a program that is designed to be the future of television.

show has always been a part of photography. They are the only ones who can see the future. They are the only ones who can see the future.

The show is not a program. It is a program that is designed to be the future of television. It is a program that is designed to be the future of television.

The show is not a program. It is a program that is designed to be the future of television. It is a program that is designed to be the future of television.

The show is not a program. It is a program that is designed to be the future of television. It is a program that is designed to be the future of television.

The show is not a program. It is a program that is designed to be the future of television. It is a program that is designed to be the future of television.

Philadelphia entertains and changes attitudes

By James Schneider

Before you go and see Philadelphia, you should know that it is a city that is changing its attitude.

Before you go and see Philadelphia, you should know that it is a city that is changing its attitude. It is a city that is changing its attitude.

Proceeds to the Heart and Stroke Foundation

For more information or to register, visit the DSA Activities Office

Blue Rodeo harvests new homegrown sound

By Jason Schwartz

The sound recording sessions are a necessary second labour for those in the pursuit of the music business in entertainment.

The third day in the Music Avenue City Hall New Young Association has ended in its last hour.

It was a very successful day in the Music Avenue City Hall New Young Association.

"It's great," said Jason Schwartz, "I got up at six, meeting with the producers, then a writer playing the piano, then they just came in a couple of days. It just felt like it was a really big day in the city of New York."

For the first time, the Toronto-based band has a third album in a row and only record the music once, after most artists will record the music in a studio.

Recorded at producer Greg Kassar's home and studio in the city, the album was recorded in the city of New York.

Since it was the first time the album was recorded in the city, the album was recorded in the city of New York.

However, the album is not the first time the album was recorded in the city of New York.
